The Seesaw is a playground classic. It still attracts players again and again, as it has for generations. The archaic play event is still with us for a reason: the tickling in the stomach when going up high, going down fast is eternally appealing. The Seesaw develops the sense of space and rhythm and leg muscles of children. These are crucial motor skills that

help children navigate the world securely, e.g. in the street when estimating time, movement and objects. The social dimension and degree of trust in your peer that is demanded when seesawing, is great training of social-emotional life skills such as turn-taking and cooperation. Empathy is trained as well, as players consider others' limits and limitations. Or as they get

inspired to try out things they didn't dare to do before, because other children dare to.

Alle Organic Robinia-producten van KOMPAN zijn gemaakt van Robinia-hout uit duurzame Europese bronnen. Op verzoek kan het worden geleverd met FSC® certificaat (FSC® C004450).

Het Robinia hout kan worden geleverd als onbehandeld ruw hout of behandeld met transparant pigment dat de nerf en gouden kleur van het hout behoudt.

De stalen oppervlakken zijn van binnen en buiten thermisch verzinkt met loodvrij zink. Het verzinken heeft een uitstekende corrosiebestendigheid in de buitenlucht en vereist weinig onderhoud.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
