

Lookout Tree

PCM53021

This beautiful climbing tree intrigues children and invites them to play again and again. Climbing is one of the favourite activities of children. In the Lookout Tree, the dense, yet varied, climbing options take children up, down and around the tree. From the top platform, children can enjoy the view of the playground and go back to the ground via the banister

bars. Apart from being great fun, climbing trains the cross-coordination and major muscle groups of children. Building up cross-coordination skills stimulates the brain's cross-modal perception, a fundament for e.g. reading skills. Cross-coordination skills additionally assist the child in navigation the surroundings securely.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
