

Super Combi 1, Supervised

FSW251

The Super Combi 1 Gated has the same options as the standard Super Combi 1 but also has a connector for battle rope, a connector for a boxing bag, and a station for barbell exercises. This item is intended for supervised or gated areas such as sports or fitness clubs, as these loose items do not satisfy safety standards for public

places.
Supervised products are only for areas that are gated or fenced-off, like fitness clubs with supervision or gated communities.

Post are made of Ø101.6 x 2mm, pre-galvanized carbon steel and powder coated, a great protection to all conditions.

The snake ladder is made of hot-dip galvanized s235 steel with the following dimensions Ø38 x 4mm. The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The rings are made of molded polycarbonate and TPE to ensure a good grip and soft surface. The rings are rotatable and allows for a large variety of exercises.

The top plate for the jumping platform is made of Ekogrip® panels that consist of a 15 mm polyethylene bottom layer, with a 3 mm top-layer of thermoplastic rubber with a non-skid effect for safe jumping exercises under all-weather circumstances.

The plate for the target is made from 19mm EcoCore™ HDPE that consists of +95% recycled post-consumer material from e.g., food packing waste in both core and colorful outer layer.

The Dip-Station is designed with inclusive in mind, allowing wheelchair users to access the bars at either end. The two bars are placed at two different widths and heights – one narrow and high and one wide and low to allow for training of different individuals and muscle groups.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
