Makalu with Shading

PCE111923

Item no. PCE111923-0901

General Product Information

Dimensions LxWxH 654x519x460 cm

Age group 4+

Play capacity (users) 9

Color options

Wow! The Makalu is a fantastic structure that attracts children from afar. The activities banister basencourage children to play longer and come back more often. The Makalu offers ample climbing and sliding for active children. The varied climbing units train proprioception and cross-body coordination which are fundamental for children's cross-modal perception and, for instance, reading instance, reading banister basence are ground. Ja cognitive constitute that attracts children from afar. The activities anister banister baniste

instance, reading skills. The slides and the banister bars are thrilling paths to return to the ground. Jacob's ladder offers climbing with a cognitive challenge, when children figure out how to move their bodies to reach the top. Apart from climbing and sliding, there are plenty of opportunities for social play that will help children to build important social and

emotional skills, and will motivate children to play for longer.

PCE111923

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

The ELEMENTS roofs are made of recyclable PE made from 33% post consumer recycled materials with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot dip galvanised inside and outside for maximum durability.

Sails of commercial 95 high density PE knitted specially for sun-shade structures. The sails are treated with UV stabilizers to ensure a long lifetime. The sails are supported by a hot dip galvanised steel frame and tightened by stainless steel devices.

item no. PCE 111923-0901			
Installation Information			
Max. fall height		221 cm	
Safety surfacing area	4	49.1 m²	
Total installation time		17.3	
Excavation volume	(0.74 m³	
Concrete volume	(0.07 m³	
Footing depth (standard)		90 cm	
Shipment weight		562 kg	
Anchoring options	In-ground	'	
	Surface	~	

Item no PCE111023-0001

The main posts are made of high quality pregalvanized steel with powder coated top finish. Post tops are closed with caps of UV stabilized nylon (PA6). The grey colored molded decks are made of 75% post-consumer waste PP material with a non-skid pattern and texture surface. All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options.

The slides are available in either molded PE made from 33% recycled post-consumer materials in different colors or in full AISI304 stainless steel with a thickness of 2mm.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Sustainability Data

PCE111923

Cradle to Gate A1-A3	Total CO ₂ emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
PCE111923-0901	1,156.00	2.67	50.40

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Kompan A/S

Verification of CO₂ calculation of: Play systems

Data version no. 2023-10-05

The $\mathrm{CO_2}$ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
