

Suspension Trainer Pro

FAZ101

Suspension training is very effective because it simultaneously increases strength, balance, flexibility, and core stability. With 49 exercises the suspension trainer is one of the most versatile pieces of exercise equipment on which all muscle groups can be trained functionally and effectively, no matter what the fitness level of the user is. With the suspension

trainer, everyone can workout at their own level due to the scalable resistance. The intensity of each exercise can be determined by adjusting the body position to add more or less resistance.

Item no. FAZ10100-0900	
General Product Information	
Dimensions LxWxH	390x106x334 cm
Age group	13+
Play capacity (users)	3
Colour options

Suspension Trainer Pro

FAZ101

The uniquely designed handles are made of PUR and a reinforced aluminium frame that ensures a strong but light design. The ergonomically shaped handles guarantee a good and pleasant grip for all users.

The big instruction signs are made as a sandwich construction consisting of 2 x 6mm polycarbonate sheets with clear instructions printed on the inside of the panels. This provides a vandalism proof solution.

Ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope, which leads to excellent wear resistance.

Item no. FAZ10100-0900	
Installation Information	
Max. fall height	0 cm
Safety surfacing area	26.5 m ²
Total installation time	7.1
Excavation volume	0.63 m ³
Concrete volume	0.35 m ³
Footing depth (standard)	90 cm
Shipment weight	359 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Coated Steel Parts	10 years
PUR Components	10 years
Ropes & Nets	10 years
Signs	10 years
Spare Parts Guarantee	10 years

Each suspension trainer has three sets of handles positioned at three different heights, 40, 90 and 130cm. This allows people of all heights to do the exercises and gives the user the opportunity to do over 40 different exercises.

To ensure the integrity of the mainframe is maintained, the orange coloured main posts are made of $\varnothing 101.6 \times 3\text{mm}$ steel posts, which are hot-dip galvanised and powder coated in a variety of colours options. The supportive posts receive the same surface treatment and are made of $\varnothing 76.1 \times 3.6\text{mm}$ steel tubes and finished with coloured powder coating.

KOMPAN's suspension trainer has independently anchored handles with a 40cm distance between the ropes. This gives the user plenty of workout space between the ropes and makes the suspension trainer extremely easy and comfortable to use.

Sustainability Data

FAZ101

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FAZ10100-0900	759.20	3.09	45.45

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
