

Climbing Net

NRO813

The Climbing Net is a versatile climber that children will want to try again and again. The inclined spider net and ropes with climbing cleats offer fun and challenging ways to climb upwards and down again. The Spider Net has partly inclined horizontal rungs, which create an extra challenge when climbing. This trains proprioception, spatial awareness and cross-

coordination. All of these motor skills are fundamental for judging distances, managing the surroundings confidently to avoid accidents. The Climbing Ropes offer a different kind of climbing, clinging on to ropes while going upwards. The varied climbing trains the arm, leg and core muscles intensely. The spacious Climbing Net can hold many, climbing

together or taking a break, using important social-emotional skills.

Item no. NRO813-1001

General Product Information

Dimensions LxWxH	249x268x260 cm
Age group	5 - 12
Play capacity (users)	7
Colour options	

Climbing Net

NRO813

Climbing rope

Physical: the small knots add support for hands and feet when climbing onto the rope, crawling up or down. Climbing supports spatial awareness, cross coordination and muscle strength. **Social-Emotional:** passing others when climbing up or down develops turn-taking skills and consideration.

Top beam

Physical: climbing over the top beam demands good spatial awareness and involves risk taking. **Social-Emotional:** fine destination for a break with friends.

Climbing net

Physical: the inclined net supports the upward climbing movement of the body. The net supports cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read. The asymmetry of the net challenges the children's climbing.

Spider net

Physical: cross coordination is supported when crawling through, over and across the net. This supports the cooperation of left and right brain half, important for skills such as reading. Core, arm and leg muscles are strengthened. **Social-Emotional:** taking a break together in the net and waiting for others to cross supports social abilities such as cooperation and communication.

Climbing Net

NRO813

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

Item no. NRO813-1001	
Installation Information	
Max. fall height	260 cm
Safety surfacing area	36.2 m ²
Total installation time	6.4
Excavation volume	2.59 m ³
Concrete volume	0.24 m ³
Footing depth (standard)	100 cm
Shipment weight	340 kg
Anchoring options	In-ground ✓
Warranty Information	
Robinia wood	15 years
Ropes & nets	10 years
Spare parts guaranteed	10 years
Stainless steel components	Lifetime

Elevated activities 0	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types
Present	0	1	1

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Nature play

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
